## DETAILED ACTION

### *Election/Restrictions*

1. Applicant's election of Group I in the reply filed on 12/21/05 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

### *Claim Rejections - 35 USC § 103*

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sakawa et al. (English translation of JP 07-066034).

Sakawa et al. discloses a vertical magnetic recording medium having an Al-based substrate coated with a NiFeP soft magnetic layer, a magnetic recording layer, and a carbon protective layer. The reference teaches that the soft magnetic layer contains 70-85 wt% Ni, with the remainder being Fe and P in a weight ratio of 8-15 (see abstract and also paragraphs 10 and 24). It would have been obvious to one of ordinary skill in the art at the time of invention to determine the optimal amount of P to be incorporated into the soft magnetic layer taught by Sakawa et al. from within the disclosed range.
